

How to Create Font Generalization File Folder

Cut and laminate the fruit names in the different fonts.

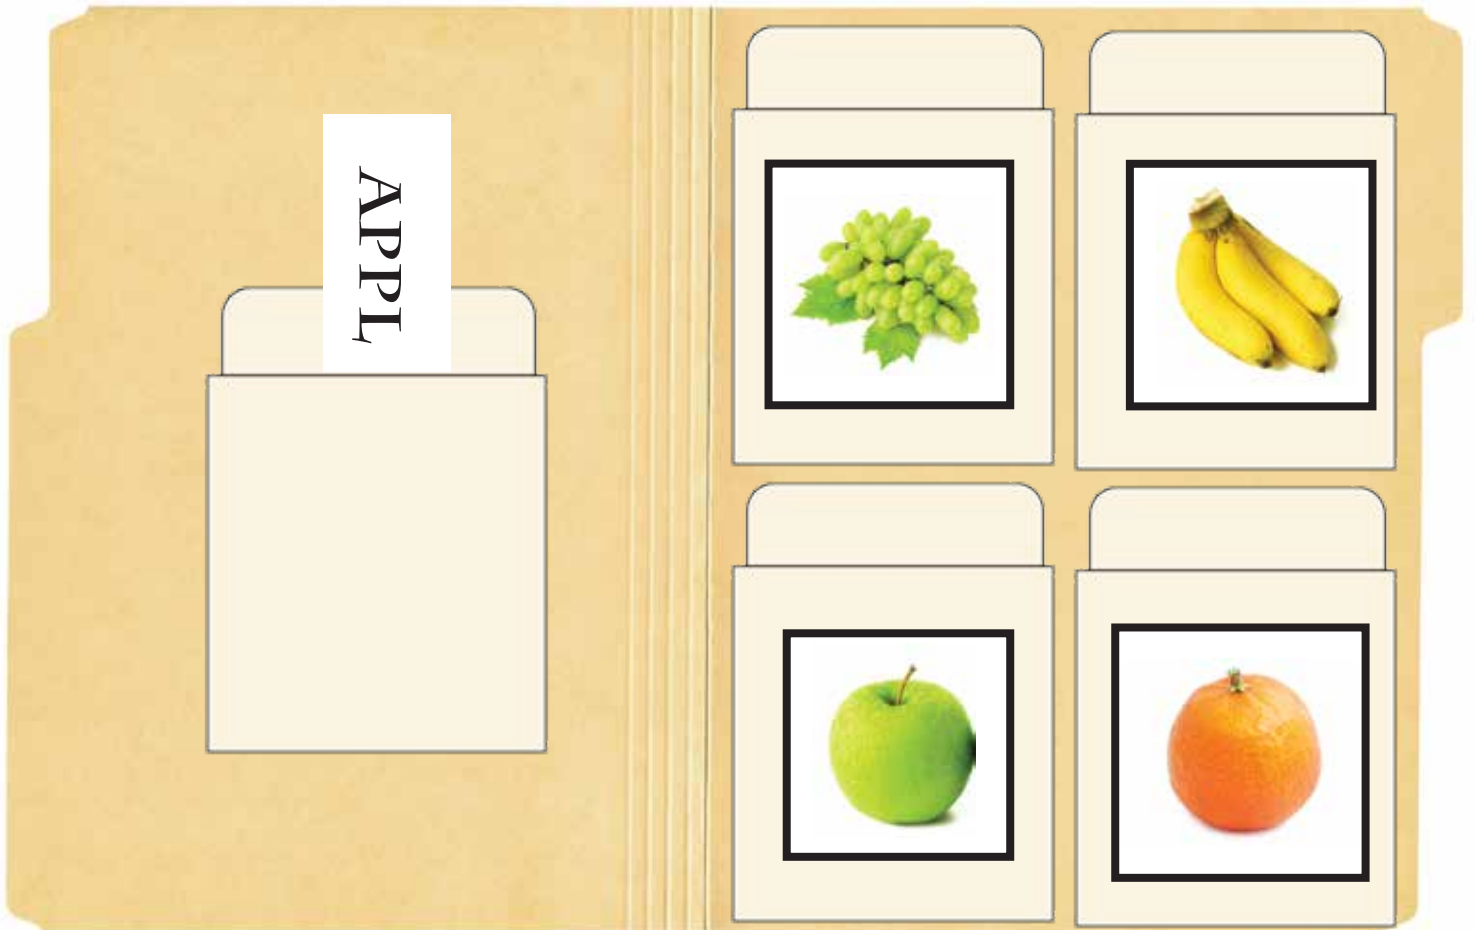

Laminate a file folder and five library pockets or envelopes.

Attach the library pockets with velcro to the file folder - one on the left side and the others on the right.

Next, cut, laminate, and velcro the photos to the library pockets.

Put all of the names into the pocket on the left to start.

Students will take the names from pocket on the left and sort them into the right.

strawberry	grapes	apple
strawberry	grapes	apple
STRAWBERRY	GRAPES	APPLE
<i>strawberry</i>	<i>grapes</i>	<i>apple</i>
strawberry	grapes	apple
